

Requirements for Minor in Mathematics

Students who wish to declare a minor in mathematics must complete the calculus sequence through [MATH 2310](#) or its equivalent with at least a 2.000 average.

To graduate with a minor in mathematics a student must complete five additional courses approved by the department of mathematics with minimum grades of C in three of the courses and minimum grades of C- in the other two. An approved course must carry at least three credits. Currently, the approved courses are those from the College department of mathematics with the MATH mnemonic numbered 3000 or higher. Either [MATH 3310](#) or [MATH 3354](#) should be one of the five approved courses. Courses with the APMA and STAT mnemonics, as well as courses from other departments or institutions can be taken if approved by the undergraduate committee.

Courses cannot be double counted for the Math minor and another major. College policy allows this only for minors in interdisciplinary departments or programs and Mathematics is not considered interdisciplinary. Students may not declare two minors.

Up to two courses that are taken from outside the University and which are equivalent to College mathematics courses may be offered for the College mathematics minor.
