

Information for Transfer Courses in Mathematics from US Colleges

Transfer Students

Students who have taken courses before they matriculate are evaluated by the College Advising Office, **consult with** Assistant Dean **Elizabeth Ozment**.

The College Departments only evaluate courses to be taken by students who are currently enrolled.

From the Undergraduate Record

http://records.ureg.virginia.edu/content.php?catoid=33&navoid=1272#Transfer_Credit

Transfer credit taken before matriculation may be used for fulfilling Area requirements, or for fulfilling major requirements with **written** permission of the department. Dual enrollment credit, however, may not be used to fulfill competency requirements. Students in the College must take the second writing requirement in the College and earn a grade of at least C-.

Only 60 credits of transfer from other universities, study **abroad**, advanced placement, or dual enrollment may count toward the 120 Credits needed for the B.A. or B.S. degree in the College.

For Enrolled Students:

The first step is to look at the UVA transfer credit evaluator page (if you forget the link, just google "uva transfer credit eval")

<http://ascs8.eservices.virginia.edu/asEquivs>

Many pre-approved courses are shown there listed by states.

Download the form

<http://college.as.virginia.edu/sites/college.as.virginia.edu/files/TransferOfCreditDomestic.pdf>

If the course you want to take is shown on this page, simply fill out the form and bring it to Ms. Burke 201C Monroe Hall as noted on

The back of the form. If the course is not there, someone in the Mathematics Department needs to evaluate the course to see if it is equivalent to a UVA MATH course. If you think it is, it is helpful when to talk/write to one of us, to bring/send the course descriptions for the transfer course and the UVA MATH course.

Currently, two courses offered for the Mathematics major can be transfer courses.
